

Education

picture found or type unknown

The Royal Meteorological Society supports teachers and the teaching of [weather](#) [1] and [climate](#) [2] in schools.

Our activity is focused on our schools' portal: www.metlink.org [3] where teachers can find curriculum linked resources, book meteorology ambassadors to visit schools and find out about events at which we will be running activities, and where students can find career and course information. Furthermore, the Society is able to facilitate meteorological instruments loans. If your school wishes to borrow equipment you can do this by [contacting us](#) [4].

The Society works together with other UK organisations, such as the [British Council](#) [5], the [Geographical Association](#) [6], the [Institute of Physics](#) [7], the [Met Office](#) [8] and the [Royal Geographical Society](#) [9] to promote learning in science and geography.
