**SPEAKER** | Mr. John Goulding, Royal Met. Soc. Amateur meteorologist

**ABSTRACT** | A personal compilation of some of the noteworthy weather events and extremes from 2019, touching upon their causes and effects. The selection will cover the UK as well as across the world, with references, where applicable, to the departures from normal and reflecting upon their

climatological extremity. Many may be well-remembered, but more unusual and quirky items are also included, and there will be the opportunity for audience participation.
