

Submitting Images for Weather

It is now possible to submit photographs for inclusion in the web site gallery, Weather and the RMetS Calendar online. Administrator approval is necessary before your image will appear in the gallery, but all images will show on the web site unless you specifically ask us not to display them online. During the upload process you can specify whether you would like your name included as the photographer or not.

Otherwise you can email photographs to weather@rmets.org ^[1] including your name, phone number and address (if your photograph is used in the calendar we will send you a copy when it is published)

File sizes for both online and emailed submissions must be under 8MB. The format should be jpg, or jpeg and for the calendar and Weather magazine the original uncompressed images are needed. However, if your image is for the web site only then a smaller file is possible.

By using the online system you guarantee that you hold full copyright for the submitted images.
