

Welsh Local Centre

Register an interest ^[1]

Email the Welsh local centre ^[2]

The Welsh Centre held its first public lecture at Cardiff University on 25 November, 2015 with Prof. Brian Golding OBE speaking on 'Advances in weather forecasting and their potential in building resilience.' Since then we have also held public lectures at Swansea University, Aberystwyth University, and the University of Chester in England. Our public lectures are open to the public and attract audience members who are both professionals and amateurs who share an interest in weather related sciences.

As a group we have diverse interests and backgrounds that include marine weather, climatology, micro-meteorology, hydrology, extreme weather events, and oceanography. We wish to promote an interest in weather and weather related sciences within Wales.

The Welsh Centre committee welcomes suggestions for future talks and offers of help from anyone who would like to get more involved in helping to run the centre. If you know of a group of individuals who would be interested in hosting a public lecture at a venue outside of Cardiff or Swansea please contact us with a possible topic and venue and we will try to find a speaker for your group.
