The Strategic Plan - 2018-2020

The Royal Meteorological Society has just released its new Strategic Plan for 2018-2020, which recognises the achievements in recent years and builds on the momentum to create a modern and progressive Professional and Learned Society for weather and climate. The Society already plays a key role as the custodian of both the science and the profession of meteorology in the UK and has an important role to play internationally as one of the world's largest meteorological Societies. This strategic plan defines how the Society will work towards delivering its vision and mission by laying out its strategic themes, priorities and outcomes for the next three year.

RMets Vision: *to be a world-leading learned and professional society for weather and climate, exemplifying our Royal Charter and charitable status and to engage, enthuse and educate all.*

RMets Mission: *to promote the understanding and application of meteorology for the benefit of all*

Underpinning Priority

The Society's strategic plan includes an underpinning priority to ensure the Society has the **capacity and capability** to achieve its strategic goals. This includes having secure and diverse sources of finance, a skilled and motivated workforce, strong strategic partnerships, sound governance, excellent communication with members and potential members, using technology effectively and an active group of volunteers. In addition, the Society will consider and integrate diversity and inclusion activities throughout the Strategic Plan and deliver on a

progression framework during the course of the plan.

Strategic Prioritised Themes

The Strategic Prioritised Themes define how the Society will meet its mission in the long term. The Society's strategic plan will be centred on FIVE strategic themes:

1. To strengthen the science of weather and climate, and related disciplines so that it **advances, is applied and made accessible**.
2. To **support and develop meteorologists and climate scientists** through professional accreditation, career advice, communication of opportunities, provision of information and networking.
3. To **enhance** the lives of all those interested in weather and climate through **opportunities** to access events, information and engagement with meteorology and the work of the Society.
4. To **share our enthusiasm** about weather and climate and to extend our reach and impact within the teaching community, the wider public and with strategic partners, to provide informal and formal education in meteorology.
5. To **increase awareness** of the importance of weather and climate in policy and **decision-making** and its relevance to society, and to be an independent voice of authority, advice and advocacy for meteorology and the profession.

A leaflet, summary document and the full strategic plan can be downloaded below.
