Please be aware this meeting has now been cancelled due to COVID-19. Please keep updated on our event website.

SPEAKER | Jim Galvin, UK
Met Office (Jersey)

ABSTRACT | This presentation will briefly look at the meteorology of the storm, but will concentrate on its effects in both southern Scotland and north-east England in the context of the post-War redevelopment of cities. I will conclude with an examination of the increasing ability of forecasters to predict the effects of these periodic,

though still comparatively rare,
storms.
