In response to advice from the Government on COVID-19, the Atmospheric Science Conference (ASC2020), due to be held in Leeds in July 2020, has been cancelled. We had hoped to postpone the conference until September, but available venue dates clashed with other events that our community are likely to attend.

We are now focusing our attention on planning ahead for 2021 and would be delighted to welcome you virtually to the conference in 2021. Follow #ASC2021 on Twitter or visit www.atmosphericscienceconference.uk ^[3] for announcements about the call for abstracts and registration details.

ASC2020
The National Centre for
Atmospheric Science and the

Royal Meteorological Society are jointly hosting the 3rd Atmospheric Science Conference in Leeds on 1-2 July 2020. This 2-day conference provides a unique opportunity to bring together atmospheric scientists with interests in weather, climate and atmospheric chemistry to present the latest research findings. The event will be held at the University of Leeds with a focus on Long-term Global Change, Air Pollution and Climate & High-Impact Weather. The Society and NCAS are aiming for the conference to be as environmental and sustainable as possible with support through its collaboration with the University of Leeds.
