Following Government advice the Society has decided to change this conference to a virtual seminar.

The Student and Early Career Scientists Annual conference provided an excellent opportunity for Masters, Undergraduate and PhD students, as well as early career scientists, working in fields related to meteorology to present their work in a friendly environment.

There was keynote speakers, poster sessions as well as sessions for oral presentations. Social events include icebreaker activities and a conference dinner, plus a photographic competition. The conference provided you with the opportunity to get to know your fellow scientists with plenty of chances for

discussion on current issues  
and to network and share your  
opinions with other delegates.
